Education

Vivekananda Institute of Professional Studies - Technical Campus

Sep 2023 – June 2026

Bachelor of Computer Application – CGPA: 8.9, Delhi, India

Experience

Full Stack Developer Intern

Remote – Bangalore, India

Dategain

Apr 2025 – Dec 2025

- Built an **AI-powered texting simulation platform** with 4 scenarios, 5 chapters, and dynamic tasks using **React** and **TypeScript**, alongside a **personalized AI Coach** leveraging **OpenAI API** for message scoring, feedback, and response optimization.
- Engineered a complete **SaaS monetization and growth system** with coins, credits, rewards, and **Razorpay integration** using **Node.js** and **Firebase**, including a **referral program** and **social sharing incentives** that rewarded user invites and milestone-based content promotion, driving increased app downloads and engagement.
- Delivered **real-time AI features** like Red Flag Radar and What's the Vibe via **prompt engineering**, built admin dashboards with advanced filtering, integrated Slack-based feedback system, and deployed cross-platform using **Capacitor** to [Google Play Store](#) 📱.

Projects

CodeUnicorn - GitHub Intelligence Platform

[Live](#) 📄 | [Code](#) 📄

Next.js, TypeScript, Express, Prisma, PostgreSQL, Inngest, Vercel AI SDK, Pinecone, Gemini API, Tailwind CSS, Turborepo, Docker, Kubernetes, AWS EC2

Feb 2026

- Built a GitHub intelligence platform with **RAG-based** context-aware systems for **automated PR reviews**, issue analysis, AI codebase chat, and repo docs generation using **Pinecone Embeddings** and **Gemini API**.
- Developed a **developer insights dashboard** to track commits, PRs, growth trends, and AI activity with real-time pipelines using **PostgreSQL**, **Prisma**, and **Inngest**.
- Architected a **scalable monorepo** using **Turborepo**, containerized with **Docker**, and deployed on **AWS EC2** with **Kubernetes** for reliable production systems.

CarvAI - Career Assistant Platform

[Live](#) 📄 | [Code](#) 📄

Next.js, Gemini API, Zod, Neon DB, Prisma, Tailwind CSS, ShadCN, React Hook Form, Clerk, Inngest, Vercel

Dec 2025

- Built **AI-powered career tools** including resume and cover letter generation with industry insights graphs using **Gemini API**, cutting document creation time by 20%.
- Developed **quiz-based skill assessments** tailored to individual user profiles via **Gemini API**, with real-time feedback on responses to track performance improve learning outcomes and skill gap visibility.
- Implemented **Clerk** authentication, optimized async background workflows with **Inngest**, and built a fully responsive UI using **ShadCN**, **Recharts**, and **Tailwind CSS**.

Technologies

Programming Languages: JavaScript, TypeScript, C++

Frontend: Next.js, React, Tailwind CSS, HTML, CSS, Framer Motion, GSAP

Backend & APIs: Node.js, Express, REST APIs, Prisma, Mongoose, Better Auth, Clerk

Databases & Storage: MongoDB, PostgreSQL (NeonDB), Supabase, Firebase

DevOps / Infra : Docker, Docker Compose, Kubernetes, Ingress, Helm, Prometheus, Grafana, AWS (S3, EC2, Cloudfront)
GitHub Actions (CI/CD), Nginx

Tools: Git, GitHub, VS Code, Figma, Inngest

Additional Details

Certifications: [Responsive Web Design \(freeCodeCamp\)](#) 📄, [JavaScript Algorithms and Data Structures \(freeCodeCamp\)](#) 📄

Open Source Contributions: Improved functionality and code quality for 5+ projects via PRs during GSSOC'25

ACE Society: Collaborated on web development projects with peers, enhancing team-based software practices
